

Galaxies; inside and out
January 25-28, 2015
School of Astronomy, IPM
Tehran

Sunday 25 Jan 2015

Time	Speaker	Title
09:00-09:45	Alvio Renzini	Complexities and simplicities in galaxy evolution
09:45-10:30	Joe Silk	Feedback in galaxy formation
10:30-11:00	Break / Posters	
11:00-11:45	Simon Lilly	Galaxies in large scales
11:45-12:30	Bahram Mobasher	Evolution of Galaxies in the Cosmic Web
12:30-14:00	Lunch	
14:00-14:40	Gerry Gilmore	Gaia-ESO and Gaia: mapping the Milky Way
14:40-15:20	Alexis Finoguenov	Environmental effects on co-evolution of galaxies and black holes across the Hubble time
15:20-15:40	Break / Posters	
15:40-15:55	Moein Mosleh	On the robustness of $z = 0-1$ galaxy size measurements through model and non-Parametric fits
15:55-16:10	Gh. Erfanianfar	Environmental dependence of star forming galaxies Main Sequence
16:10-16:25	Hadi Rahmani	UVES Large Program for testing fundamental physics
16:25-16:40	Hassan Fathi	Large scale structure of the universe in absorption

Monday 26 Jan 2015

Time	Speaker	Title
09:00-09:45	Marcella Carollo	Fresh news on the relation between galactic structure, quenching of star-formation and environment
09:45-10:30	Jacco van Loon	Stellar death and their feedback: massive stars
10:30-11:00	Break / Posters	
11:00-11:45	Gerry Gilmore	Chemical element constraints on dwarf galaxy structure and evolution
11:45-12:30	Fatemeh Tabataba	Star formation and Feedback in galaxies
12:30-14:00	Lunch	
14:00-14:45	Areg Mickaelian	The Emission Line Spectrum of Galaxies and AGN zoo
14:45-15:30	Feng Yuan	Black hole accretion and jet formation
	Free evening	

Tuesday 27 Jan 2015

Time	Speaker	Title
09:00-09:45	Reynier Peletier	Structure and evolution of dwarf elliptical galaxies
09:45-10:30	Jesus Falcon	Angular Momentum of galaxies across the Hubble Sequence
10:30-11:00	Break / Posters	
11:00-11:45	Gary Mamon	The nature and mass assembly history of compact groups of galaxies
11:45-12:30	Simon Driver	Galaxy And Mass Assembly (GAMA)
12:30-14:00	Lunch	
14:00-14:30	Marcella Carollo	The impact of mergers on the evolution of galaxies in different environments
14:30-15:00	Gary Mamon	The frequency of young galaxies in the present-day Universe
15:00-15:25	Habib Khosroshahi	Probing galaxy formation with observations of galaxies groups
15:25-15:45	Break / Posters	
15:45-16:00	Saeed Tavasoli	Galaxies in voids; Models vs Observations
16:00-16:15	Atefeh Javadi	Star formation history and dust production in local group galaxies
16:15-16:30	Ghassem Gozali	Big misses: observation of an unaccounted population of the young brightest cluster galaxies
16:30-16:45	Halime Miraghaei	AGN activity in fossil galaxy groups
16:45-16:55	Mojtaba Raouf	Age dating galaxy groups and clusters
16:55-17:05	Alireza Molaei	Bulge morphology and stellar Kinematics in barred galaxies

Wednesday 28 Jan 2015

Time	Speaker	Title
09:00-09:45	Alvio Renzini	Formation of galactic bulges and the inside-out evolution of galaxies
09:45-10:30	Simon Lilly	Star formation in galaxies
10:30-11:00	Break / Posters	
11:00-11:45	Bahram Mobasher	Relation between Kpc-scale and globe properties of galaxies
11:45-12:30	Jacco van Loon	Stellar death and their feedback intermediate mass stars
12:30-14:00	Lunch	
14:00-14:30	Sohrab Rahvar	MOG/Non-local Gravity as an alternative to dark matter
14:30-14:50	Hosein Haghi	Possible smoking-gun evidence for initial mass segregation in re-virialized post-gas expulsion star-burst clusters
14:50-15:10	Shant Baghram	In search of Cosmological Dark Matter Microhaloes
15:10-15:30	Shahram Abbasi	Hot Magnetized Accretion Flows Around Black Holes
15:30-15:50	Break / Posters	
15:50-16:05	Farhang habibi	Effects of cosmic structures on SNe luminosity
16:05-16:20	Elaheh Hamraz	FOCUS: new opportunity to study the formation of dwarf galaxies
16:20-16:35	S. Sheikhnezami	Launching and propagation of MHD jets; Young stellar objects to AGNs
